#### PROXIMAX POUR-ON FOR BEEF AND DAIRY CATTLE INDICATIONS:

For the treatment and control of gastrointestinal roundworms (including inhibited immature *Ostertagia ostertagi*) and lungworm in cattle

For sucking and biting lice, sarcoptic and chorioptic mange mites and buffalo fly in beef and dairy cattle.

Proximax Pour-On aids in control of cattle tick (Boophilus microplus) For the treatment and control of gastrointestinal roundworms and lungworm in deer

PROXIMAX Pour-On for Beef and Dairy Cattle contains eprinomectin, a member of the macrocyclic lactone family of drenches. It is effective against eprinomectin sensitive strains of internal parasites. Resistance can develop to any drench.

#### **CATTLE: Gastointestinal Roundworms:**

For the control of adult and immature:

For the control of adult and immature:

Ostertagia ostertagi (including initible 4.4) – small brown stomach
worm, 0. Ingrata – brown stomach worm (adults only)

Ostertagia spp. Haemonchus placei – barbers pole worm,
Trichostrongylus axei – stomach hair worm, T. colubriformis.intestinal hair worm, Trichostrongylus spp. Cooperia spp. (including
inhibited L4) – small intestinal worm, C oncophora,
C. pectinata, C. punctata, C. surnabada, Oesophagostomum radiatum
– podulu worm, Desophagostomum ena

on political of the model worm, Oesophagostomum spp.

Nematodirus helvetianus – thin necked intestinal worm

Bunostomum phlebotomum – hookworm, Trichuris spp. – whip worm

(adults only)

Lungworm Adult and immature Dictyocaulus viviparus
Sucking and biting lice Linognathus vituli, Haematopinus

Bovicola (Damalinia) bovis. Solenopotes capillatus Donical parliaming voris, orderboyees capinates Mittes Chriptes bovis, Sacroptes scable var bovis Buffalo Fly Haematobia irritans exigua When used as directed, Proximax Pour-On also aids control of: Cattle tick Rhipicphalus (Boophilus) microplus (not recommended for use in strategic tick control programs)

### PERSISTENT ACTIVITY IN CATTLE:

Proximax Pour-On when given at the recommended dosage of 1 mL/10 kg liveweight controls infections with:

Parasite*	Prolonged Activity
Ostertagia spp.	Up to 28 days
Cooperia spp.	Up to 28 days
Dictyocaulus viviparus	28 days
Nematodirus helvetianus	Up to 28 days
Oesop hagostomum radiatum	Up to 28 days
Haemonchus placei	21 days
Trichostrongylus spp.	21 days

\*The following parasite species are included within each of the relevant genera: Osterfagia osterfagi, O. leptospicularus, O. lyrata, Cooperia oncophora, C. punc- tata, C. surnabada, Trichostrongylus axei, T. colubriformis.

**DEER - Gastrointestinal roundworms:**Ostertagia - type spp. \*(adults)
Trichostrongylus spp. (adults and fourth stage larvae)
Mazamastrongylus spp. (adults) Oesophagostomum spp. (adults

\*includes 0. mossi/dikmansi, 0.lyrata, 0.leptospicularis, Spiculopteragia spiculoptera, Sp.asymmetrica and Aptergia quadrispiculata

## Lungworms:

Dictyocaulus viviparus (adults and fourth stage larvae). For best results Proximax Pour-On for Beef and Dairy Cattle should be part of a total parasite control program including internal and external parasites. Resistance may develop to any drench Consult your veterinarian for a complete parasite control program.

# **DIRECTIONS FOR USE:**

DIRECTIONS TOR USE:
DOSAGE AND ADMINISTRATION:
Proximax Pour-On for Beef and Dairy Cattle contains eprinomectin, a member of the macrocyclic lactone family of drenches. It is effective against eprinomectin sensitive strains of internal parasites. Resistance can develop to any drench.

For best results PROXIMAX Pour-On should be part of a total parasite control program including internal and external parasites. Resistance can develop to any drench

Consult your veterinarian for a complete parasite control program

A representative sample of animals should be weighed with either scales or a weighband. Dose the mob accordingly to the heaviest animal by liveweight in the group (cows, bulls, calves, heifers, hinds, stags, fawns etc). Do not underdose. Where there is a large variation in size within the group, draft into two or more lines based on bodyweight, to avoid excessive overdosing.

This product is formulated only for pour-on application to cattle and deer; do not use in other species. The formulation should be applied along the topline in a narrow strip extending from the withers to the tall head. The dose rate is 1 mL for each 10 kg liveweight.

A 20L drum contains enough solution to treat 800 head of 250kg cattle or 2000 head of 100kg deer.

The same of the sa						
Liveweight (kg)	Dose Volume mL)	Liveweight (kg)	Dose Volume mL)			
Up to 50	5	251 - 300	30			
51-75	7.5	301 - 350	35			
76-100	10	351 - 400	40			
101- 125	12.5	401 - 450	45			
126-150	15	451 - 500	50			
151 - 175	17.5	501-550	55			
176 - 200	20	551 - 600	60			
201 250	25	601 650	CE.			

Heavier animals (for example mature bulls) should receive an additional 5 mL for each 50 kg over 650 kg.

# WITHHOLDING PERIODS: CATTLE MILK: Zero (0) days CATTLE MEAT/DEER MEAT: Zero (0) days TRADE ADVICE: EXPORT SLAUGHTER INTERVAL EXPORT SLAUGHTER INTERVAL (ESI): Zero (0) days

Before using Limiterval, (ESI): Zero (I) (IQ) (IQ)S. Before using Limited or the APVMA website (www.apvma.gov. au/residues). Consult your veterinarian for the assistance in the diagnosis, treatment and control of parasitism.

## ANIMAL SAFETY

Studies have demonstrated a wide safety margin. Five times the recommended use level had no adverse effect on cattle or deer. Three times the recommended use level had no adverse effect on breeding performance of cows and bulls.

# NOTE TO USER

Rainfall before or after treatment will not affect the efficacy of Proximax Pour-On.

## PRECAUTIONS

Close container when not in use

Do not apply to areas of the backline covered with mud or manure. This product is for application to skin surface only, do not give orally or by injection.

## INSTRUCTIONS FOR THE 20L PACK:

- Replace the shipping cap with the dip tube assembly.
  Attach the draw-off tubing to the dosing applicator and to the top
- stem on the dip tube cap
- Gently prime the dosing applicator checking for leaks
- Follow the dosing applicator manufacturer's directions for adjusting the dose and proper use and maintenance of the equipment.

## STORAGE

Store below 30°C (Room Temperature) Store bottle or pack in carton to protect from light

### DISPOSAL

If the container has the drumMLISTER logo visible, and has been If the container has the drumMUSTER logo visible, and has been thoroughly cleaned and dried, and id free of any visible residues, it can be recycled at any drumMUSTER collection or similar management program site. The cap should not be replaced, but may be recycled separately with the container. Triple pressure rinse Proximax Pour-On containers and dispose of rinsate in compliance with relevant local, state or territory government regulations. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean container to recycler or designated collection point. If not recycling, break, crush or puncture container and deliver to an approved waste management facility, is not available. buty facility. If an approved waste management facility is not available, bury the broken and crushed or punctured containers 500 mm below the surface and in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and trees roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

### ENVIRONMENT PROTECTION

Studies indicate that when eprinomectin comes in contact with the soil, it readily and tightly binds to the soil and becomes inactive over time. Containers and any residual contents should be disposed of safely in an approved landfill as free eprinomectin may adversely affect fish and certain water-borne organisms.

#### SAFFTY DIRECTIONS

Poisonous if swallowed. Will irritate the eyes. Avoid contact with eyes. Repeated exposure may cause allergic disorders. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.For further information, refer to the Salety Data Sheet which is available from the supplier.

#### FIRST AID:

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

#### SAFFTY DATA SHFFT

For further information refer to the Safety Data Sheet (SDS), which can be obtained from the supplier.
